SUMMARY

Senior Software Engineer with 8+ years of experience designing, developing, testing, and deploying scalable enterprise applications using Java, Spring Boot, Microservices, REST APIs, SQL, and relational databases.

Expertise in Java/Spring Boot backend development, microservices architecture, SQL/database integration, Hibernate, PostgreSQL, and MySQL, with experience optimizing database queries and improving application performance.

Strong hands-on experience with Apache Kafka, RabbitMQ, event-driven architecture, asynchronous messaging, AWS, Kubernetes, Docker, Jenkins, GitHub Actions, and CI/CD automation. Experienced in building secure RESTful APIs, integrating distributed systems, troubleshooting production issues, and delivering reliable cloud-native applications. Experienced in developing responsive single-page applications with React and Angular.

TECHNICAL SKILLS

Languages: Java (Core & Advanced), Python, JavaScript, TypeScript, SQL

Frameworks & Libraries: Spring Boot, Spring MVC, Spring Security, Hibernate, React.js, Angular, Node.js

Cloud & DevOps: AWS (EC2, S3, Lambda, RDS, EKS), Kubernetes, Docker, Terraform, Jenkins, GitHub Actions

Databases: PostgreSQL, MongoDB, Redis, MySQL

Messaging & APIs: Apache Kafka, RabbitMQ, RESTful APIs, GraphQL

Practices: Microservices Architecture, Event-Driven Design, CI/CD, Agile/Scrum, TDD, GenAI Integration

AI & LLM: Agentic AI, LLM orchestration, prompt engineering, GitHub Copilot, Claude, Cursor

CERTIFICATIONS

- Java (Basic) – HackerRank (skills certification) – Sept 2026
- Docker Training Course for the Absolute Beginner – KodeKloud (certificate of completion) – Sept 2026
- Introduction to Cloud Infrastructure: Describe cloud concepts – Microsoft Learn (trophy) – Sept 2026
- Academy Accreditation: Generative AI Fundamentals – Databricks (badge) – Sept 2026
- Claude Code in Action – Anthropic (certificate of completion) – Sept 2026
- Introduction to Subagents – Anthropic (certificate of completion) – Sept 2026
- Agents and Workflows – OpenAI Academy (badge) – Sept 2026
- IBM Python for Data Science – CognitiveClass.ai (IBM badge) – Sept 2026
- Business Analytics with Excel – Simplilearn (certificate of completion) – Sept 2026
- What Is Generative AI? – LinkedIn Learning (certificate of completion) – May 2025

EXPERIENCE

Wells Fargo (Senior Software Engineer)

July 2025 – Present

Contracted Senior Software Engineer

Iselin, NJ

- Develop and maintain enterprise-level Java/Spring Boot applications supporting large-scale financial services infrastructure.
- Collaborate with cross-functional teams to deliver scalable microservices solutions adhering to strict regulatory and compliance standards.

- Developed enterprise Java and Spring Boot microservices with strong focus on SQL-based data processing, relational database integration, and transaction management.
- Implemented REST APIs with OpenAPI/Swagger documentation and secured service endpoints using Spring Security, JWT, and OAuth2.
- Developed unit and integration test cases using JUnit and Mockito and integrated automated testing into CI/CD pipelines.
- Containerized Spring Boot microservices using Docker and supported deployments across Kubernetes/AWS cloud environments.
- Used Jira and Confluence for sprint tracking, requirements management, technical documentation, and knowledge sharing.
- Used Maven and Gradle for build automation, dependency management, packaging, and deployment of Java/Spring Boot applications.
- Accelerated delivery by using AI coding agents (GitHub Copilot, Claude, Cursor) for code generation, refactoring, and unit test scaffolding.
- Built LLM-orchestrated agentic workflows to automate multi-step tasks such as code review assistance and technical documentation.

Visa Inc. (Senior Java Software Engineer)

Feb 2022 – Jan 2025

Senior Java Software Engineer

Foster City, CA

- Architected and delivered scalable microservices using Java, Spring Boot, and AWS, supporting billions of transactions globally.
- Optimized backend system performance, achieving a 30% reduction in API response time through profiling, caching (Redis), and query tuning.
- Developed and documented RESTful APIs using OpenAPI/Swagger and implemented secure API authentication and authorization using JWT/OAuth2 with Spring Security.
- Developed complex SQL queries and optimized database operations using PostgreSQL, including query tuning, indexing, execution-plan analysis, and transaction management.
- Led REST and GraphQL API integrations enabling seamless, real-time data flow across distributed payment systems.
- Built and maintained CI/CD pipelines using Jenkins and GitHub Actions, significantly improving deployment frequency and reliability.
- Developed database-driven backend services using Oracle, SQL Server, and PostgreSQL, including complex SQL queries, stored procedures, indexing, and transaction management.
- Supported production applications by troubleshooting incidents, analyzing application and database logs, performing root-cause analysis, and resolving performance issues.
- Developed automated unit and integration tests using JUnit and Mockito to validate business logic, REST APIs, and microservice integrations.
- Participated in SAFe Agile development practices, including PI planning, sprint planning, backlog refinement, retrospectives, and cross-functional technical discussions.
- Implemented event-driven architecture with Apache Kafka for high-throughput, fault-tolerant asynchronous messaging.
- Leveraged AI coding agents (GitHub Copilot, Claude, Cursor) to reduce boilerplate code and accelerate developer productivity across the engineering team.
- Applied LLM orchestration to chain agentic AI steps for log analysis and faster production issue triage.

Ondas Networks Inc. (Java Software Engineer)

Feb 2021 – Feb 2022

Java Software Engineer

California

- Built high-performance backend services with Java, Spring Boot, and Hibernate for mission-critical network communications systems.
- Integrated third-party APIs and improved event-driven messaging with Kafka, enhancing system reliability and throughput.
- Developed React.js and Angular UI components to improve end-user experience and system visibility.
- Managed AWS infrastructure (Lambda, S3, RDS), enabling scalable and cost-efficient cloud deployments.

Hartford Financial (Java Developer)

Mar 2019 – Dec 2020

Java Developer

Boston, MA

- Developed backend microservices using Java, Spring Boot, and Hibernate for financial data processing pipelines.
- Optimized AWS deployments (EC2, RDS) and improved database query performance and scalability.

APA Corporation (Software Engineer)

Mar 2017 – Feb 2019

Software Engineer

Texas

- Built RESTful web services and backend components using Java and Hibernate; implemented authentication and AJAX-based interactivity.

EDUCATION

Bachelor of Science in Computer Science

2011 – 2014
